

DRIVEN BY POSSIBILITY™

GATES DATA CENTER COOLING SOLUTIONS

STAY AHEAD OF THE GAME WITH ADVANCED COOLING SOLUTIONS

The amount of power needed to process the large quantities of data for AI technologies and cloud computing generates a significant amount of heat. This requires robust cooling systems to maintain optimal performance.

As data centers expand, the combined heat produced by densely packed servers and networking equipment can reach critical levels. Gates is leading the way in developing cutting-edge solutions to provide superior heat management and meet those growing demands.

THE GATES DIFFERENCE

- Experts in thermal management, materials science, and fluid conveyance in critical applications
- Family of zinc-free, peroxide-cured EPDM data center hoses specifically designed for cleanliness and flexibility
- Compact and efficient electric water pumps provide a higher power-to-volume ratio
- Reliability and quality are designed into our products to maximize uptime
- High-efficiency, customizable solutions that scale to your needs

DISCOVER THE ULTIMATE IN COOLING TECHNOLOGY

GATES DATA MASTER™ HOSES

The Data Master Family of Hoses offers cooling solutions designed to meet the demanding needs of modern data centers. Data Master and Data Master MegaFlex™ are engineered for superior heat management and made to deliver superior flow and minimal maintenance. Whether you need flexibility for complex configurations, durability for high-density environments, or faster liquid cooling, Gates has you covered.

DATA CENTER COOLING APPLICATIONS

- High-density server cooling
- Large-scale cloud computing facilities
- Edge computing and modular data centers
- Supercomputing and AI applications

CLEANER SYSTEMS

Zinc-free peroxide-cured EPDM tube to avoid fluid contamination over time

FLAME RESISTANT

UL94V-0 certified and tested to UL224 VW-1 standards

SUPERIOR FLEXIBILITY

For easier routing and installation

COOLANT COMPATIBLE

Built for a wide range of coolant mixes, including PG25

OZONE-RESISTANT

Excellent ozone resistance to cover degradation from electronics

PROPRIETARY TECHNOLOGY

Gates MegaFlex cover and our zinc-free, peroxide-cured EPDM tube materials

THE SCIENCE OF COOL: ZINC-FREE PEROXIDE-CURED EPDM

- **Faster cooling flow:** Optimized design and materials allow for rapid heat dissipation
- **Debris-free:** Prevents the buildup of contaminants, reducing the risk of blockages
- **Reduced maintenance:** Minimizes the need for frequent replacements, reducing downtime and operational costs

DIFFERENT COLORS FOR DIFFERENT APPLICATIONS

Data Master hoses are available in **white** as a multi-purpose data center hose, **blue** for supply lines, and **red** for return lines. Customize your cooling system for maximum efficiency.

GATES DATA CENTER COOLING SOLUTIONS

ELECTRIC WATER PUMP PRODUCT FAMILY

ELECTRIC WATER PUMP LINEUP

THERMAL-FORMED NYLON TUBING SOLUTIONS

Gates offers several options of smaller profile, custom thermal-molded nylon tubing in alternate colors for tight routings.

OIL-BASED AND LARGE I.D. HOSE SOLUTIONS

Gates offers a wide variety of fluid conveyance solutions to meet data center requirements, including oil-based solutions compatible with dielectric oil and flexible larger diameter solutions.

GATES POWER TRANSMISSION PRODUCT FAMILY

QUAD-POWER™ 4

A premium maintenance-free premium V-belt that delivers unmatched power density, fitting into compact spaces while driving fans, pumps, and compressors with up to 98% total power efficiency.

With Gates Quad-Power 4, you're investing in a long-lasting solution that eliminates retensioning downtime and reduces replacement cycles, allowing your team to focus on the job without interruptions.

MAINTENANCE-FREE

Superior products remove the need to retension the belt drive after installation

ETHYLENE ELASTOMER (EE)

EE rubber compound ensures long-lasting performance and wear-resistance

TEMPERATURE-RESISTANT

Wide temperature range for an extended lifespan in extreme conditions

STATIC-CONDUCTIVE

Prevents damage to equipment in sensitive environments

OIL-RESISTANT

Made to withstand temporary contact with oil without being damaged

LENGTH-MATCHING

Superior belt tolerance allows multiple belts to be installed on the same drive

POLY CHAIN® GT™ CARBON™

When your data center faces peak operational demands, Poly Chain GT Carbon synchronous belts handle the heaviest loads with ease. Ideal for demanding applications such as high-torque HVAC systems and large-scale coolant pumps. The patented use of carbon fiber tensile cord provides increased horsepower rating for greater power density and compactness.

MAINTENANCE-FREE

Superior products remove the need to retension the belt drive after installation

DURABLE CONSTRUCTION

Polyurethane materials that resist chemicals, oil, pollutants and abrasion

CARBON TENSILE CORD

Robust cord combines minimal stretch with strength and load-carrying capacity

TEMPERATURE-RESISTANT

Wide temperature range: -65°F to +185°F (-54°C to +85°C)

LUBRICATION-FREE

Nylon tooth facing reduces friction and eliminates the need for lubrication

GT TOOTH PROFILE

Provides high shear strength and improved load carrying capacity
