UPGRADE TO PREMIUM GATES BELTS FOR QUANTITATIVE COST SAVINGS

EXPLORE OUR HVAC SOLUTIONS

As energy costs continue to impact operations, it's more important than ever that your facilities run efficiently. Gates offers high-performance Synchronous and V-belts designed to increase your system efficiency and decrease operational expenses.

GATES SYNCHRONOUS BELTS

Gates PowerGrip™ and Poly Chain® Carbon™ Volt™ belt drive systems

- Negate common forms of energy loss, such as slip and torque loss due to the positive tooth/groove engagement.
- Provide a maintenance-free solution that operates at 99% efficiency for the drive's life.

See a return on investment in as little as three months!

GATES V-BELTS

Gates Quad-Power™ 4 bandless and Super HC™ V-belts

- Designed to minimise stretch and the frequency of re-tensioning.
- Gates Quad-Power™ 4 belts are maintenance-free. They maintain stable tension over their entire lifetime without needing periodic re-tensioning.
- Gates Super HC™ belts combine the strength of a wrapped belt construction with the economies of a narrow-section V-belt.

Maximise power transmission efficiency and eliminate problems that impact your HVAC system's performance!

CASE STUDY: REDUCE ENERGY COSTS WITH EFFICIENT SYSTEMS

A French tire producer wanted to upgrade the drive in their HVAC system for their location in Poland. They wanted to go from a V-belt drive to a synchronous belt drive to **increase efficiency, reduce maintenance fees, and energy costs**. Gates provided the perfect solution.
