DEMAND MORE
DEMAND GATES

In the toughest of conditions, oil rig operatives need parts that won't let them down, from a supplier that won't let them down. One that will not fail under pressure.

They need a provider like Gates: because when our customers demand more, we deliver – every time. With unsurpassed quality, in industry-leading lead times.

RECEIVE UNPARALLELED QUALITY

At Gates, we prioritise quality and safety above all else. Our products undergo rigorous on-site testing to ensure uncompromising quality, providing you with the peace of mind you deserve.

With the understanding that failure is not an option in demanding, high-performance applications, our API (American Petroleum Institute) - certified products are designed to meet these needs continuously, day and night.

Trust in the Gates Black Gold legacy to deliver excellence in performance and safety.

RECEIVE UNMATCHED SPEED

We understand that quality alone is not enough; prompt delivery is crucial. That is why our commitment to innovative technology is at the centre of everything we do: our cutting-edge retroactive bonding (RAB) and state-of-the-art crimp technologies allow us to shorten lead times considerably.

Increase your uptime and productivity with standard delivery times that are faster than our competitors. Products delivered at the right time, every time.

RECEIVE UNCOMPROMISING RELIABILITY

In the realm of offshore oil rig operations, where demands are high, it's reassuring to have a nearby supplier that can precisely meet your needs when you need it most.

Our strong global presence is rooted in a regional approach that allows you to benefit from the proximity of production and service facilities worldwide.

You can rely on a close-by parts provider without compromising on expertise, which remains unmatched in the industry.

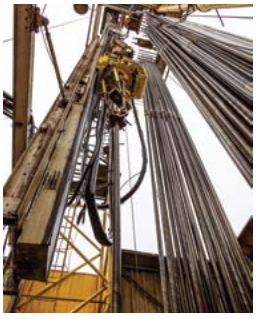
DEMAND THE COMPLETE PACKAGE PARTNER WITH GATES EVERY STEP OF THE WAY

By selecting Gates, you not only opt for unparalleled quality and performance but also gain the advantage of a supplier offering ongoing assistance throughout the lifecycle of our products.

ON-LOCATION SITE SURVEYS

Gates specialists can visit your location and perform a full, onsite application requirement (and risk assessment). This includes in-situ visible inspection of your critical hose assembly, full product inventory, and scheduled maintenance analysis.

Upon completion, you will receive a detailed component bill of materials by location and operating system to support ongoing compliance and safety reviews, with recommended replacement intervals to avoid unplanned downtime.



QUICK DELIVERY & ON-HAND INVENTORY

Gates excels at providing what you need when you need it. We combine a fully stocked component inventory with revolutionary bonding technology to cut delivery times in half. Ensure your facility's uptime and productivity by partnering up with Gates for the industry's best lead times, meeting all your urgent requirements.

INSPECTION, MAINTENANCE & REPAIR (IMR)

A successful equipment maintenance program begins with Inspection, Maintenance & Repair (IMR) Services from Gates. Gates IMR Services provide periodic inspection and thorough testing of your oil drilling and service hoses, ensuring your critical hose assemblies meet all regulatory standards and certifications.

Gates IMR includes a visual inspection through an endoscopic hose analysis and a thorough internal and external hose cleaning, with a pass/fail rating at every stage. Your Gates hose assembly expert then performs any necessary hose maintenance, recommends component replacements, and runs a hydrostatic test to ensure the integrity of the hose meets the demands of your flexible pipe or hose assembly application.

HOSES - EXPLANATION OF SYMBOLS

* Avaliable with operating temperature -25°C to +121°C.

APPLICATION	Flexible connection between standpipe and top drive or between pump and standpipe for pumping mud at extra high pressure in oil drilling and exploration work.
CONSTRUCTION	Bore: Smooth bore, full bore
	Tube: Nitrile Butadiene Rubber (NBR) Hydrogenated Nitrile Butadiene Rubber (HNBR)
	Reinforcement: Multiple layers of textile fabric and steel cable
	Cover: Polychloroprene rubber (PCR)
TEMPERATURE	NBR liner: -25°C to +100°C (-13°F to +212°F) HNBR liner: -25°C to +121°C (-13°F to +249.8°F)
STANDARDS	API 7K 6th Edition FSL1 and FSL2, ISO 47693, ABS Type Approvals
COUPLINGS	Bonded (FSL2)
MAXIMUM AVAILABLE LENGTH	60 m

APPLICATION	Blow out preventer (BOP) systems requiring high pressure, high temperature and flame resistant control lines certified to API 16D and Lloyds 1000/499 fire test for five minutes at 1300°F (704°C).
CONSTRUCTION	Bore: Smooth
	Tube: Black, oil resistant Nitrile
	Reinforcement: Multiple alternating layers of braided or spiraled, high-tensile steel wire
	Cover: Fiberglass loaded, red, oil and abrasion resistant Chloroprene
TEMPERATURE	-40°C to +100°C (-40°F to +212°F)
STANDARDS	API 16D specifications and Lloyd's 1000/499 fire test – 5 minutes at 704°C (1300°F). Gates fire resistant BOP assemblies have been certified by Lloyd's Registry.
COUPLINGS	Crimped couplings with over-ferrule fire protection
DESIGN FACTOR	4:1

QC47 COUPLING

QC47 QUICK CONNECT COUPLING

SIZES	1/4 TO 2"
PRESSURE	5,000 psi for 1/4" to 1-1/4"
	3,000 psi for 1-1/2" & 2" (in Stainless Steel 316)
	5,000 psi for 1-1/2" & 2" (in special Alloy Steel)
MATERIALS	Standard Stainless Steel 316 & Carbon Steel
	Also available in other materials upon request
END TERMINATIONS	Male and Female body ends threaded NPT Female to ANSI B1.20.1
TYPICAL APPLICATION	Hydraulic control for blowout preventer stacks

APPLICATION	High temperature and flame resistant control lines certified to ISO 15540/15541 fire test (ABS/DNV).
TEMPERATURE	-25°C to +100°C (-13°F to +212°F)
CONSTRUCTION	Bore: Smooth
	Tube: Black, oil resistant Nitrile
	Reinforcement: Multiple alternating layers of high-tensile steel wire
	Cover: Fiberglass loaded, red, oil and abrasion resistant PCR
STANDARDS	ISO 15540/15541
COUPLINGS	Crimped couplings with over-ferrule fire protection
DESIGN FACTOR	5:1

WATER (DISCHARGE)

BLACK GOLD DRILL WATER 300D

mm	in.	mm	in.	bar	psi	bar	psi	kg/ft.	lb./ft.	ft.	Pack

APPLICATION	Transfer of non-potable water or liquids not containing oils or chemicals from a supply ship to an offshore drilling rig or platform. Various water-based transfer applications for offshore or onshore work sites. The heavy duty reinforcement is designed to survive extreme oilfield application requirements. The specially compounded cover material is designed to withstand the harshest environment including abrasion and weathering.
TEMPERATURE	-40°C to +66°C (-40°F to +150°F)
CONSTRUCTION	Tube: Type P (EPDM)
	Reinforcement: Synthetic, high tensile textile
	Cover: Type P (EPDM)
STANDARDS	ABS Type Approval for 2-5" ID
COUPLINGS	Crimped or swaged couplings
DESIGN FACTOR	3:1

APPLICATION	Transfer of water, petroleum–based fluids, dilute acids, chemicals and abrasive slurries used in oil and gas well stimulation and fracking. Transfer of refined fuels (commercial gasoline, diesel fuel) oils and other petroleum products. Transfer hoses are designed for intermittent contact with refined fuels and must be drained after use. Ideal for offshore/onshore dock hose transfer applications involving suction and discharge service for diesel oils and other similar petroleum products where an extremely light–weight, hardwall, flexible hose with a high rated working pressure and a small minimum bend radius is required. For Bio–Diesel and other alternative fuel applications, see Fuel Master™ XTreme™. Petroleum transfer hoses may be used with all grades of Bio–Diesel only if the exposure is intermittent and the hose is drained between uses.
TEMPERATURE	-40°C to +82°C (-40°F to +180°F)
CONSTRUCTION	Tube: Type C (Nitrile) Reinforcement: Synthetic, high tensile textile with static wire Cover: Type A (Chloroprene) Type L (Ultra High Molecular Weight Polyethylene) Megatuff UHMWPE Type C4 (Carboxylated Nitrile) Black with Red Stripe, Yellow Carboxylated Nitrile (C4) Wear Indicator Layer
STANDARDS	Tube: ARPM (Class A) Nitrile for high oil resistance
COUPLINGS	Interlocking ground or washer Joint, permanent swaged or crimped coupling
DESIGN FACTOR	4:1
CAUTION	Do not convey fueld over +49°C (+120°F)

APPLICATION	Transfer of abrasive, water based and petroleum based drilling fluids from a supply ship to an offshore drilling rig or platform; and for transfer applications on offshore or onshore drilling rigs or platforms. The nitrile tube material is designed to provide chemical resistance to petroleum based fluids. It uses the same tube compound as Gates Black Gold Grade D & E Rotary & Vibrator hoses. The heavy duty reinforcement is designed to survive extreme oilfield application requirements. The polychloroprene cover material is designed to withstand the harshest offshore environment including abrasion, weathering (cracks) and extra chemical resistance for any petroleum products that may come in contact with the cover.
TEMPERATURE	-40°C to +82°C (-40°F to +180°F)
CONSTRUCTION	Tube: Type C (Nitrile)
	Reinforcement: Synthetic, high tensile textile with static wire
	Cover: Type A (Chloroprene)
STANDARDS	ABS type approval. Tube: ARPM (Class-A) - High Oil Resistance
COUPLINGS	Crimped or swaged couplings

152	6	181	7.14	17.2	250	68.9	1000	2.5	5.51	100	PLT-T	3129-1014

APPLICATION	Transfer of abrasive materials such as barite and cement from a supply ship to an offshore drilling rig or platform; and for transfer applications on offshore or onshore drilling rigs or platforms. The natural rubber tube is specially compounded to conduct electricity and made with extra thickness to resist abrasion. The heavy duty reinforcement is designed to survive extreme oilfield application requirements. The specially compounded cover material is designed to withstand the harshest environment including abrasion and weathering.
TEMPERATURE	-40°C to +66°C (-40°F to +150°F)
CONSTRUCTION	Tube: Type D3 (Natural Rubber)
	Reinforcement: Synthetic, high tensile textile
	Cover: Type D (SBR)
STANDARDS	ABS type approval for 3, 4, 5" ID. Hose designed to withstand 6.0 ton tensile force.
COUPLINGS	Crimped or swaged couplings
DESIGN FACTOR	4:1
CAUTION	The hose tube is specially compounded to conduct electricity. No static wires are required - the helical wires in the SD version can be connected to the couplings for extra protection.
