

**BECAUSE
YOUR PEOPLE MATTER**

DRIVEN BY POSSIBILITY™

SIMPLIFIES HOSE SELECTION

MXT consolidates different hose specifications into one hose construction, which makes training new employees faster and allows operators to concentrate on their task, not hose selection.

EASIER TO BEND

With up to 35% less force-to-bend over other compact hose constructions, MXT is faster to install and easier to route, which increases productivity while also taking care of your people.

LIGHTER TO CARRY

MXT is easier to lift and move, especially for employees performing repetitive tasks.

MXT™

KEEPS YOUR WORK FORCE SAFE AND ON THE JOB

BECAUSE

OPERATIONS DEMAND EFFICIENCY

DRIVEN BY POSSIBILITY™

FASTER AND EASIER ON-APPLICATION ROUTING

Overcome bottlenecks and reduce mis-routings with MXT. Faster assembly means increased output for your operation.

LIGHTER WEIGHT = COST SAVINGS

MXT reduces overall equipment weight in transport, decreases bulk hose freight costs, and helps you meet weight reduction targets. MXT's weight savings also reduces wear and tear on your equipment and improves fuel efficiency.

REDUCE MATERIAL COSTS

Flexible by design and tested for tighter bend radius, MXT allows you to use less hose to get from port-to-port.

LESS MATERIAL HANDLING

With faster and easier assembly production, this multi-spec hose saves you time and workhours while simplifying your inventory.

MXT™

SIMPLICITY IS A STRATEGIC ADVANTAGE

BECAUSE PERFORMANCE WINS

DRIVEN BY POSSIBILITY™

IMPROVE YOUR FUEL EFFICIENCY

MXT reduces weight by up to 20 kg on equipment.

INNOVATE YOUR PROJECT

MXT is engineered with Gates materials science expertise offering you enhanced new wire technology and a slimmer profile for compact areas. MXT delivers weight and flexibility advantages, while simplifying hose replacement and service.

CERTIFIED FOR
600000
IMPULSE CYCLES

3x SAE AND EN INDUSTRY STANDARDS

PREMIUM RELIABLE PERFORMANCE

MXT exceeds industry performance standards. With greater flexibility, a smaller bend radius, and lighter weight, it's easier to route and install in tight, complex spaces.

MORE RESPONSIVE EQUIPMENT

Less weight on extended boom arms is just another advantage of MXT.

MXT™

ENGINEERED AS YOUR UNIVERSAL HYDRAULIC SOLUTION

BECAUSE

OPERATIONAL CHALLENGES WERE MEANT TO BE OVERCOME

DRIVEN BY POSSIBILITY™

**HOW DID GATES DO IT?
MATERIALS SCIENCE INNOVATION.**

PUSHING BOUNDARIES

Enhanced wire technology and increased wire braid pack density make MXT a lighter, stronger, more flexible cross-functional hydraulic solution.

EXCEEDING EXPECTATIONS

At Gates, we engineer application-specific solutions using premium materials that offer the best performance, like the proprietary, new wire braiding process developed for MXT.

INTENTIONAL INNOVATION

This process of discovery and intentional innovation leads to technology breakthroughs, allowing us to create solutions that exceed the expectations of our customers around the world.

PREMIUM PERFORMANCE

Our Materials Scientists designed MXT to be flexible and lightweight without compromising quality or durability. It performs at 600,000 impulse cycles, 3x SAE and EN industry standards.

MXT™

INNOVATION NEVER RESTS

MEET MXT. THE NEXT GENERATION OF PREMIUM HYDRAULICS.

DRIVEN BY POSSIBILITY™

IMPROVED FLEXIBILITY

Overcome bottlenecks and reduce mis-routings with MXT. With up to 35% less force-to-bend over other compact hose constructions, MXT is faster to install and easier to route. This also means MXT allows you to use less hose to get from port-to-port.

LIGHTER WEIGHT = COST SAVINGS

MXT reduces overall equipment weight in transport, decreases bulk hose freight costs, and helps you meet weight reduction targets. MXT's weight savings also reduces wear and tear on your equipment and improves fuel efficiency.

PERFORMANCE WINS

Lighter weight means improved equipment performance and fuel efficiency, while exceeding standard performance.

YOUR PEOPLE MATTER

Faster and lighter assembly supports increased output, more ergonomic installation and easier lifting for the people you rely on to make business happen.

SIMPLIFIES HOSE SELECTION

MXT consolidates different hose specs into one hose construction, which saves you time and workhours while simplifying your inventory. This makes training new employees faster and allows operators to concentrate on their task, not hose selection.

MXT™

REDEFINING WHAT'S POSSIBLE AROUND THE WORLD
