

## WATER PUMPS

# RELIABLE OE QUALITY. EASY TO INSTALL.

The water pump is the heart of the engine's cooling system and plays a vital role in ensuring that the vehicle performs at its best. When it fails, it's usually a short time until the engine overheats causing serious damage. So when water pumps require replacement, **insist on top-quality water pumps from Gates made to the same high standards as the original product.**

With its own manufacturing facility, Gates produces over a thousand different types of water pumps for millions of cars. **Gates water pumps deliver longer-lasting service for your customers and build a reputation of reliability for your shop.** For vehicles where the pump is part of the accessory belt drive system, we now also offer individually boxed pumps.

**THE GATES WATER PUMP RANGE OFFERS DIFFERENT TYPES OF PUMPS TO MATCH OE. FEATURES AND BENEFITS BUILT INTO EVERY GATES WATER PUMP ARE:**

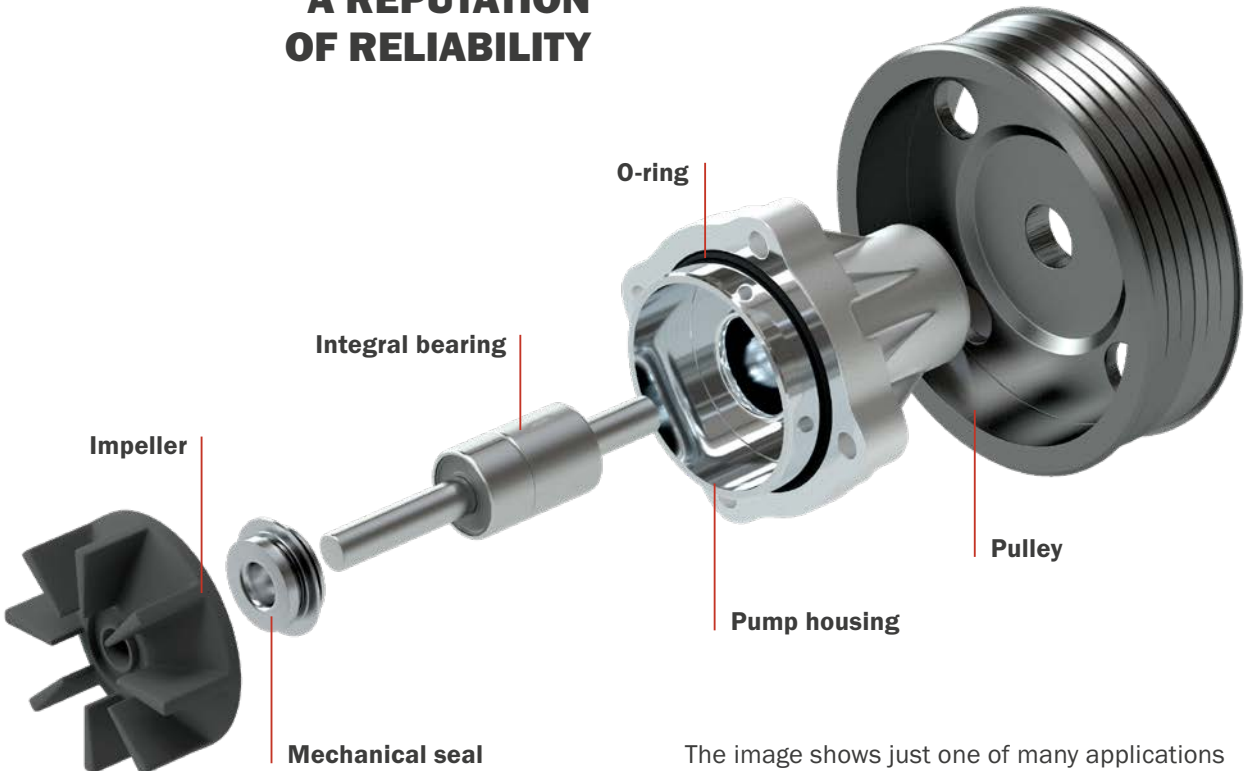

**GENUINE PERFORMANCE**

- Gates is a prime manufacturer of water pumps allowing full control of the manufacturing process and quality of the product
- All pumps are strictly equivalent to the original product, both in terms of quality and performance
- All pumps are manufactured to ISO/TS16949, ISO14001 and OHSAS18001 standards

**100% WORRY-FREE, RELIABLE OPERATION**

- A true “all makes” premium-quality water pump programme
- Covering more than 130 million vehicles in Europe
- Constructed with premium alloy materials
- Over 50% of all warranties are due to seal failure, but not with Gates: 100% quality tested mechanical seal for leak-free, long-life performance

**A REPUTATION OF RELIABILITY**

**DRIVEN BY POSSIBILITY™**
