

**DRIVEN BY POSSIBILITY™**

**WHEN HIGH MAINTENANCE OR FREQUENT REPLACEMENT OF DRIVE COMPONENTS BECOMES THE NORM, IT'S TIME TO CHANGE TO POLY CHAIN® GT™ CARBON™ BELT DRIVE SYSTEM**

Belt drives are compact and require no lubrication

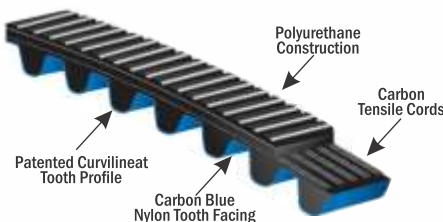

Belt drives are quieter, clean and their positioning is accurate.

**THE PAIN IN THE CHAIN**

- Short service life - 1 year or less service
- Changing the sprocket and chain takes a significant amount of time
- Shorter service life in corrosive & wet environment
- Excessive noise
- If chain fails, the downtime can be expensive
- Chains will elongate requiring removal of links out of the chain - resulting in downtime

**BENEFITS OF POLY CHAIN**

- Maintenance free (length variable)
- Increased cleanliness for the facility + reduced maintenance cost
- No Need for crane rental to replace the belt
- Save on the cost of chain replacement
- 98+% efficient
- Save a significant amount on sprocket cost and replacement

**POLY CHAIN® GT™ CARBON™ available in 8M, 14M and 19M.**
